

BEFORE YOU BOOK THE TESTS, PLEASE READ THE FOLLOWING CAREFULLY:**IMPORTANT INFORMATION**

1. Having the tests carried out does not constitute a guarantee that your hair will re-grow.
2. The test results do not constitute a medical diagnosis. For a medical diagnosis, please consult your doctor or dermatologist.
3. Please do not order the supplement test (Test 4) if you are pregnant or breastfeeding. If you fall pregnant while on the supplement plan, you will need to inform us immediately.
4. The supplement plan you will receive when you order the tests is tailor-made to your specific needs and is not transferable to someone else.
5. You will need to start the supplement plan within four weeks of receiving the test results. After four weeks, your Supplement Plan is no longer valid.
6. Be aware that you may be required to cut out certain foods as part of the supplement plan.
7. If the tests show metal toxicity or invasive organisms, it can take up to 18 months to detox from these. During this time, retests will have to be carried out approximately every three months. The retest fee is £70.
8. It may be necessary to have amalgam fillings removed if they are a problem.
9. This is not a quick fix supplement plan. If your hair growth can be restored, it can take up to 12 months to see progress with your hair.
10. In my experience over the last 24 years, your chances of success are highest if you eat meat, fish or eggs at least 6 days a week. Your chances of success are greatly diminished if you are vegetarian, even if you eat dairy, as most people with hair loss are intolerant to animal dairy. If you are vegan, I will not be able to help you.
11. Do NOT order the tests if you are on any recreational drugs, including weed/marijuana.
12. It is OK if you do interval fasting, but I won't be able to help you if you are fasting longer than 18 hours.

HGUK TESTING IS DIFFERENT FROM CONVENTIONAL LABORATORY TESTING**Conventional laboratory testing**

Advantage: You will get a figure of how much of a toxin has been detected in your urine, blood or hair sample.

Disadvantage: The figure you get as a result of conventional testing will not include the amount of toxins that have been stored in body tissue over the years. Stored amounts of toxins can be considerable so that the actual amount of toxins present in your body is higher than the figure you are given by the laboratory.

Disadvantage: You will be given a 'normal range value' with your test results. The normal range will tell you whether the level of toxin in your body is considered 'acceptable' or whether it is considered a danger to your health. However, the normal range does not take into account differences between individuals. What is normal for one person is abnormal for the next person.

Disadvantage: If you are within the normal range, your doctor will do nothing about the toxin because the test gave you the 'all clear'. However, if you are sensitive to a particular toxin, this toxin can cause you health and hair loss problems, even if you are within the normal range. Your 'all clear' is therefore inaccurate.

HGUK bioenergetic testing

Disadvantage: You will not get a figure for the toxins that were found in your sample. Instead, you will be told that there is or that there is not a problem with a toxin.

Advantage: The HGUK testing will pick up a toxin in its entirety, i.e. in your blood, your urine and in your body tissues where it may have settled over the years.

Advantage: You get a tailor-made plan of exactly which supplement/s you need to take to remove the toxin from your body. In that way, physical balance is restored which increases the chances of your hair recovering

Advantage: You get a tailor-made plan of how long you need to take your supplements for and at which dosage.

Advantage: You can ask questions via e-mail if you are not clear about your supplement plan or feel you have a problem with any of the supplements, and I will get back to you with an answer, normally within 2 working days, often faster.

PLEASE RETAIN THIS SHEET FOR YOUR RECORDS.

ORDER FORM

Please carry out the following test/s (please tick boxes you require):

- 1 Toxic metals £ 80**
- 2 Invasive organisms £ 80**
- 3 Food intolerances £ 80**
- 4 Supplement test £ 100** (not available on its own)

**If am currently booked out and unable to accept new clients for hair sample testing.
Please check my website www.hairgrowthUK.net again in May 2025 to see whether places are available again.**

PLEASE WRITE CLEARLY *or go to www.pdfescape.com to fill this in on your computer*

Mr / Mrs / Miss / Ms

Date of birth:.....

First Name Surname

House number and Street

Town/City

Tel. no. E-mail address

Your personal details will NOT be sold to third parties.

For UK clients only

I have made a bank transfer for £ into the following account:

Vera Peiffer
Nationwide
Sort code: 07-02-46
Account: 0803 5841

For UK clients and all international clients

I would like to pay £ by **PayPal**. Please send me a PayPal invoice.

Please fill in the next few pages either on your computer or by hand (neatly please!).

You can then either

- *print out all the pages, including this one, and send them by post, together with your sample,*

or

- *take photos of each page and email them to me at hairgrowthUKhelp@gmail.com and send your sample with your name on it separately in the post.*

How to take a hair sample

If your hair is actively falling out at the moment: Go with your fingers through your hair and close your fingers. Send me hair that has been left between your fingers. I need at least 5 hairs.

If your hair is thinning but not actively falling out: Cut off approximately **5 hairs** from the back of your neck, close to the scalp. If you have no hair on the back of your neck, hair from other places on the head is OK as well.

It does not matter if your hair is dyed. If possible, send unwashed hair.

Do not take the hair from a brush as this could contain someone else's hair and confuse the results.

Put your sample into a white clean piece of paper or tissue and lightly sellotape it shut. **I cannot accept hair that has been wrapped in plastic.**

How to take a nail sample

If you have no hair or your hair is too short, send in some nail clippings from fingernails. If you wear nail varnish, you need to take it off before you cut the nail. The larger you can make the clipping, the better. If in doubt, send little clippings from several nails.

Put your sample into a white, clean piece of paper and sellotape it shut so the clippings cannot fall out of the paper. **I cannot accept nails that have been wrapped in plastic.**

QUESTIONNAIRE

WHERE DID YOU HEAR ABOUT US? Please tick relevant box.

If you are **vegetarian, please complete this form and send it back together with your order form and sample.**

I regret that I won't be able to help you if you are vegan.

If you are **pescatarian, you do not have to sign this form.**

Disclaimer Form

I confirm that I am vegetarian but I am prepared to eat eggs.

I confirm that I have been advised that heavy metal detoxification will only be possible if I eat 1 tablespoon of meat and/or fish on at least 5 days a week in addition to eggs.

I understand that without regular intake of meat, fish or eggs, the detoxification process will be severely hampered, and my chances of improving my hair growth are substantially reduced.
